Dear Tony:

When we at FISHEYE, Inc. were forced to pursue legal action to enforce our buy-out agreement we knew that the process would be difficult. Your leadership and attention to the law, the legal process, the technical details and the over-riding concepts of the case brought us a successful outcome. More importantly, throughout the often brutal process we knew we could count on your motives, your judgment and your competence without reserve.

During a large lawsuit it's often difficult to tell who is on your side. We are thankful that we could count on you, and we encourage others who find themselves in similar difficulty to put you on their team.

Regards:
